

PulseNext

ELEGANCE AROUND SECURITY SYSTEMS

Next generation security, unforgettable design
From bank networks deploying ATMs across multiple locations to retailers with stores all over the globe, Pulse Next adapts to most security threat profiles.

- The keypad comes in two color options:
satin chrome or full black, ensuring visual consistency with different vault manufacturers across the branch network.
-

The programmable time delay adjusts to location-specific risk assessments, allowing for longer delays at isolated outdoor machines and shorter delays at attended branch lobbies.

Concealed LED activates only during status confirmation, maintaining the professional appearance expected in customer-visible areas.

TECNOSICUREZZA
Locks & Security Systems

Two mounting versions (flat and standard) accommodate different safe manufacturers across your network without custom ordering.

10-user management system with individual credentials creates accountability across locations.

Penalty mode protects assets after failed attempts while silent alarm notifies security teams during duress situations.

Two side-mounted modules enable additional components like Dallas key readers and emergency battery contacts.

Backlit keypad guarantees full accessibility regardless of lighting conditions.

Whether installed in dimly lit vault rooms or variable-light environments, users can always locate and operate the keypad with confidence.

The outer ring rotates independently while the keypad remains fixed, providing clear visual confirmation of the lock's status.

Keypad

- Standard and flat version
- 10 numeric keys and 1 key for backlight activation
- Key control function
- Backlit keypad
- Red LED
- Buzzer
- Battery compartment (emergency contacts only in the flat version)
