

OUR HISTORY

The history of TECNOSICUREZZA starts in Verona in 1983.

Founded by Franco Miller, an expert technical director from the world of safes, the company was initially the official distributor of high-security lock brands for Southern Europe.

TECNOSICUREZZA quickly became known for having the most innovative products on the market.

Over the years, the company increased its expertise, investing significantly in research and development. This led to becoming a leader in the design and marketing of locks, keyboards and software for managing and maintaining the highest levels of security management.

Since 2023, TECNOSICUREZZA has been part of Gunnebo Safe Storage, a global provider of certified physical security solutions.

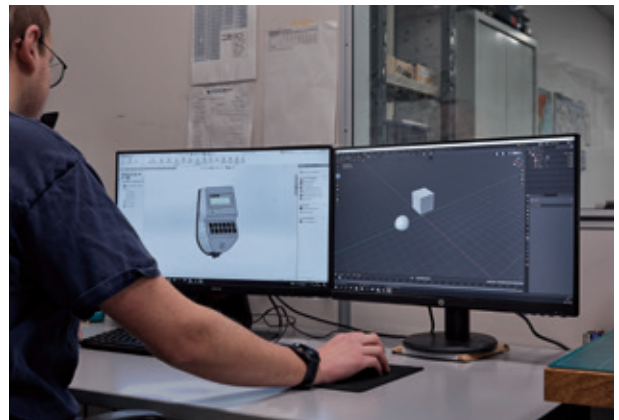

TIMELINE

VIEW OF HEADQUARTERS

OUR COMPANIES

TECNOSICUREZZA headquarters is located in Verona, Italy, with offices in both Spain (since 1987) and the United States (since 2017).

We also continuously expand our global presence through a vast network of authorised installers and distributors and through agreements with customers and partners with an international presence.

OUR CUSTOMERS

TECNOSICUREZZA serves global customers and partners such as credit institutions, large retail brands, manufacturers of safes, vaults and strong rooms, Cash-In-Transit (CIT) companies and national postal services.

With a department dedicated to research and development, the company has always invested in innovative solutions to meet current and future customer needs.

Customers and partners see TECNOSICUREZZA as a reliable partner not only for the products offered but also for support and advice.

Over 40 years of experience in safety

CUSTOMER SEGMENTS

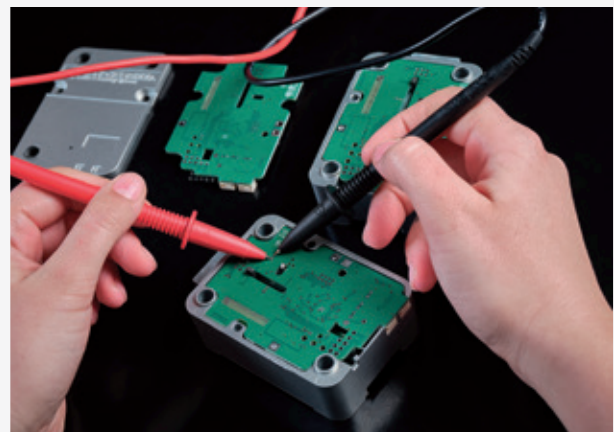

INNOVATION AND CUSTOMISATION

Technological innovation has always been at the center of the company's strategy. We are investing in new technologies to capitalise on our strong innovation capacity and future-proof our products.

100% of the production and assembly of our products takes place in Italy. We maintain full control of the value chain for our products, from R&D and production to testing and sales.

The close proximity of all of these functions under one roof creates synergies and drives innovations.

Our R&D and production synergies also allow us to quickly respond to customer needs and customise our solutions. Our advanced software capabilities enable a high level of customisation to meet customer requests and tailor solutions to the needs of different geographic markets.

Our line of locking systems starts with the **Pulse** product, with entry-level functions. Next up is the **MiniTech** with one-time code (OTC) support. The top of the range is represented by the digital **TechMaster**, a multi-user system equipped with IP functionalities, a display, the ability to manage different locks through a single keypad, and numerous other features.

With **TechMaster** it is also possible to implement both remote control – through the proprietary **CorenWeb** software – and the generation of OTC codes through the proprietary **DyamaWeb** software.

Solutions with key and/or knob locks, electromechanical locks and **Dallas key** opening systems are also available.

CERTIFICATIONS

Operating in the world of safety means creating and certifying your products following the most rigorous quality standards, both in the production phase and in the after-sales service phase.

TECNOSICUREZZA is ISO: 9001 and 45001 certified and, depending on the products, has acquired numerous VDS, UL, WIT and A2P certifications over the years. Locks and keyboards are designed and built in the Verona headquarters by highly specialised personnel and are subjected to numerous checks to test their quality and resistance.

TECNOSICUREZZA has both a branched network of assistance centres in Italy and in the world, and internal staff specifically dedicated to service. Training courses and updates are also carried out on an ongoing basis for partners all over the world.

SUSTAINABILITY APPROACH

TECNOSICUREZZA is committed to running a sustainable business, minimising our environmental impact, and promoting diversity, ethical conduct and fair working conditions. We have taken

proactive initiatives in these areas and now, as part of Gunnebo, we are adopting the Group's sustainability approach.

OUR BUSINESS

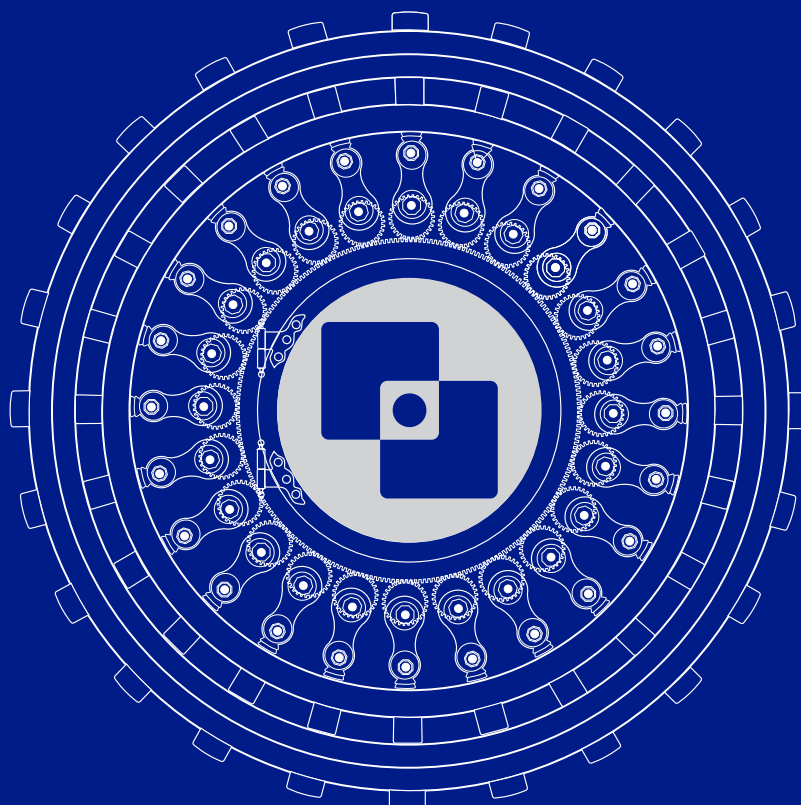

-  **Business Ethics**
Ensure high business ethics in everything we do
-  **Suppliers**
Strive towards a sustainable supply chain
-  **Customer Privacy & Data Security**
Ensure high security for our customers and employees

OUR PEOPLE

-  **Health & Safety**
Provide safe work conditions and prevent work accidents
-  **Employee Development**
Develop our employees with focus on career development reviews and trainings
-  **Diversity & Inclusion**
Offer a diverse and inclusive workspace and support local community initiatives for a diversified society

OUR IMPACT

-  **Climate & Energy**
Strive to be a climate neutral business with focus at own operations
-  **Resource Efficiency**
Optimise use of virgin material, water, waste and chemicals
